

KLINGE CORPORATION

Klinge Corporation is one of the leading providers of specialized transport refrigeration in the world. Established in 1984, as a spin-off of the Transport Refrigeration Equipment department of York-Borg Warner, Klinge has been actively producing refrigeration units and generator sets in the York area for almost 25 years. We at Klinge pride ourselves in our proven and consistent ability to customize products to provide our customers with the optimal solutions for their needs. Klinge Corporation's founding principle is to provide our customers with tailored products that are of superior quality and supported by exceptional service.

Continuing in this tradition, Klinge Corporation became ISO 9001 certified. The ISO 9001 standard was set by the International Organization for Standardization (ISO) made up of representatives from various standards organizations. ISO 9001 provides guidance on creating an effective quality management system that ensures customer requirements are met and that customer satisfaction is enhanced.

Klinge Corporation's ISO 9001 registered Quality Management System is fully integrated into each of its departments, including Management, Engineering, Production, and Sales. The ISO 9001 system upholds our stringent quality standards and ensures continuous improvement and innovation in each of our departments as well as our processes. In that spirit, Klinge developed a Quality Policy that directs the way in which our organization functions:

Klinge Corporation is committed to meeting and exceeding customer requirements by maintaining an organizational culture that promotes continuous improvement and innovation.

This aforementioned commitment is the cornerstone upon which Klinge has built its reputation. Klinge's Quality Management System ensures that all processes—from design, to production, to testing, to inspections—are carefully managed and monitored. These formal processes build on Klinge's dedication to providing quality products and services to our customers.
